

Onboard Inspection of 8-year old MarineLINE® Coated Cargo Tanks on the M/T Hatice Ana

The tanker, M/T Hatice Ana, which is owned by Mercan Shipping, arrived in 2017 at the CEKSAN Shipyard in Turkey, where the MarineLINE® inspection team carried out an onboard inspection to check on the general conditions of the tank coatings.

The vessel's cargo tanks were originally coated with MarineLINE® in October 2009.

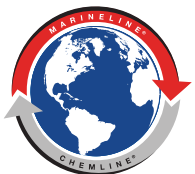

In viewing the tanks the general conditions looked very good. There were only minor mechanical damages noted on the coating along with some small hairline cracks in some tanks. No coating repairs were conducted during the dry docking.

The shipowner was pleased with the results of the tank inspection and the condition of the MarineLINE® coating after 8 years of service carrying a range of chemicals including:

Vegoil	CPP	Glycerine	Molasses
Sun Flower	Fish Oil	Aromatics	LAB
Seed Oil	Olive Oil	Paraxylene	Linpar
Caustic Soda	Wine	Palm Stearine	Toluene
Solution	Xylene	Soya Bean Oil	Solvent Naphtha
Tallow Oil	Benzene	VAM	SN 150 / SN 900
Paraffin Wax	EDC	Methanol	Kerosene
Slack Wax	Fame	Acrylonitrile	Vegacid Oil
